Kalyana Sundaram V

Game & Tools Engineer

Bengaluru, Karnataka, India | kalyan.wired@gmail.com | linkedin.com/in/kalyana-sundaram-v-742ba731

PROFESSIONAL SUMMARY

Game and tools engineer with experience leading rapid prototypes and building gameplay systems, Unity production pipelines, and native Windows and Android products. Works across Unity/C#, Cocos/TypeScript, and .NET with a focus on readable architecture, testable automation, and fast delivery.

EXPERIENCE

Independent Game & Tools Engineer | Independent | March 2026-Present

- Builds gameplay prototypes, Unity content pipelines, and local-first desktop and Android tools for engineering, asset, finance, and media workflows.
- Created ProjectPulse, Ludo Demolition, and the AssetForge/PackTriage pipeline, combining product engineering with testable automation and AI-assisted review.

Gameplay Engineer | Qila Games | November 2024-March 2026

- Contributed gameplay and product systems for Ludo Hero in a four-developer team with artists, covering local and network board play, progression, rewards, UI, and service integrations.
- Worked across Unity, C#, UniTask, Nakama, Firebase, and Addressables while keeping public descriptions high-level and confidentiality-safe.

Prototype Team Tech Lead / SDE2 | Bombay Play | September 2021-May 2023

- Led delivery across 12 rapid game prototypes; Word Wall and seven Match10 variations advanced into production development.
- Built gameplay, content-generation, level, pacing, control, and power-up systems while coordinating engineering with game design and art.

SELECTED ENGINEERING EVIDENCE

ProjectPulse | WinUI 3, .NET, C#, SQLite, Git, OpenAI

- Local Windows workspace for tickets, commits, activity, schedules, agent handoffs, and structured AI-assisted slice review.

AssetForge / PackTriage | Unity, C#, PowerShell

- Staged 427-pack triage and normalization pipeline with dependency containment, GUID preservation, manifests, and SHA-256 verification.

Ludo Demolition | Unity 6, C#

- Mobile-first demolition prototype with contract, tool, destruction, procedural settlement, economy, progression, and automated validation systems.

CORE SKILLS

Unity | C# | Gameplay Programming | Game Development | Developer Tools | Procedural Generation | .NET / WinUI 3 | Cocos Creator | TypeScript | Android / Java | Git | Testing and Automation | SQLite | Firebase | Nakama | Addressables

EDUCATION

Bachelor of Engineering in Computer Science | Meenakshi Ramaswamy Engineering College | Affiliated with Anna University
